

Online Bill Pay

Convenient and Secure

Send money now, schedule a payment later or pay automatically right from your desktop.

Make all your business payments through one secure online site and eliminate the hassle of writing checks.

Online Business Bill Pay puts you in control of your payment processing. Set up a single payment or recurring payments on the dates you choose. For greater convenience, enroll in eBills – electronic versions of your paper bills sent directly to your Online Bill Pay account.

How does it work?

1. **Login** to Business Online.
2. **Select** Bill Payments from the Quick Launch or Management Tools Menu.
3. **Set up** your Payees. Pay any person or company within the U.S. Use our directory to quickly add a company/person to your payment center or input the full billing details for any payee. Once your payees are set up, you can make payments quickly and conveniently from the Payment Center.
4. **Choose** the account to pay from. Multiple accounts can be set up within Bill Pay and you can make multiple payments at one time. Simply choose the account the funds will be debited from and start scheduling.
5. **Input** the payment amount and select the Pay Date. Once an amount has been entered, the interactive calendar displays the first day that a payment can be delivered. The Pay Date is affected by the delivery method of the payment – electronic or regular check. You can enter a different Pay Date as long as it is after the “minimum” Pay Date displayed.
6. **Select** Make Payments.
7. **Confirm** the Payment Details and Submit.

Online Bill Pay is a fast and easy way to pay bills 24/7, allowing you to control your payments on one secure site.

Let us show you how your bank can help your business succeed.
